

Trina Salvisberg is a Senior Engineer for Great Lakes Region Operations at Enbridge Energy Company, an energy transportation company that operates the longest, most sophisticated crude oil and liquids transportation system in the world. Trina has 7 years of experience working for Enbridge across western Canada and Midwestern U.S. Her contributions have helped Enbridge achieve operational excellence, allowing the company to become a leader in the safe and reliable delivery of energy in North America. Trina graduated from the University of Alberta in 2011 with a bachelor's degree in materials engineering, specializing in nano and functional materials.

Enbridge builds upon its foundation of operating excellence by adhering to a strong set of core values -- Integrity, Safety, and Respect. Trina demonstrates a commitment to these values through active participation in high school Career Days and Junior Achievement programs throughout the Great Lakes operating region. She is passionate about increasing awareness of the energy industry as well as promotion of women in STEM careers.
