

GENE MATRIX **Pioneering the Future of Personalized Healthcare**

Tarek Younis
Gene Matrix Founder

As a leading biotechnology company, Gene Matrix is dedicated to democratizing access to precision medicine and ensuring that individuals, employers, and healthcare providers benefit from advanced genetic testing.

Gene Matrix, founded by Tarek Younis and headquartered in Bedford Park, Illinois, is revolutionizing healthcare through cutting-edge genomics, AI-powered insights, and secure data analytics. As a leading biotechnology company, Gene Matrix is dedicated to democratizing access to precision medicine and ensuring that individuals, employers, and healthcare providers benefit from advanced genetic testing.

A NEW ERA OF GENOMIC INNOVATION

At the heart of Gene Matrix's mission is the commitment to personalized medicine. By leveraging pharmacogenomics, artificial intelligence, and secure cloud-based technology, Gene Matrix delivers actionable health insights that empower individuals to make informed healthcare decisions. These advancements help prevent chronic diseases, improve medication efficacy, and enhance overall wellness.

OVER-THE-COUNTER GENOMICS TEST KITS: A GAME-CHANGER FOR EMPLOYERS

One of the most impactful innovations from Gene Matrix is its over-the-counter genomics test kits, now available to any company looking to reduce healthcare costs while improving employee well-being. These easy-to-use kits provide critical insights into medication effectiveness, hereditary health risks, and preventative care, helping employees manage their health proactively. By offering these test kits, businesses can save thousands in healthcare costs, reduce the financial burden of unnecessary treatments, and promote a healthier, more productive workforce. Gene Matrix is transforming corporate health strategies by integrating preventative genomic testing into employee wellness programs.

Our DNA Tells Our Whole Story..

Medications work differently in everyone

You have genetic variants that impact how you metabolize medications. Gene Matrix helps identify the best medications based on your unique DNA.

Clinical Guidance

A Gene Matrix pharmacogenomic test incorporates the most up-to-date clinical guidance, including evidence-based recommendations.

Medically Actionable

Find out which medications are right for you. Gain insights that you and your doctor can use to create a precise medication plan.

..You Just Have to Read it Thoroughly

ADVANCED GENOMIC SERVICES

Gene Matrix provides a comprehensive suite of genetic testing solutions, including:

- **Pharmacogenomics Testing:** Tailoring medications to individual genetic profiles, reducing adverse reactions, and optimizing treatment outcomes.
- **Hereditary Disease Risk Assessments:** Identifying genetic predispositions to conditions such as cancer, diabetes, and cardiovascular diseases.
- **AI-Powered Health Reports:** Cutting-edge algorithms analyze genetic data to offer precise, clinician-friendly reports.
