**Illinois Chamber of Commerce:
Rebuild Illinois multiyear IDOT plan will help improve
state's greatest economic asset**

"The multi-year, data driven, IDOT investment plan the governor announced today is a major step in implementing a transportation modernization program that will improve Illinois' greatest economic asset," said Illinois Chamber of Commerce President and CEO Todd Maisch. "The Multi-Year Plan, along with the Lockbox Amendment, assures taxpayers that their transportation tax dollars are being invested in improving Illinois' roads, bridges, transit and freight infrastructure. Revenue raised this summer is already having an impact and the plan shows continued and significant investment is underway. Thank you to Governor Pritzker, our legislative leaders and all legislators who voted for this transportation modernization program."
